Career Profile

Developing and Programming in web development for 3+ years with experience in both Frontend and Backend for a Full-Stack developer. Mostly working for small businesses in the technology field to be able to transition from Maintenance Supervisor to a Full-Stack developer.

Equipped with the ability to create, debug, and deploy websites and apps by utilizing skills gained in the programming industry, using my communication skills to build beneficial relationships with coworkers that fosters a positive environment. Skilled in languages such as Python, HTML, CSS, JavaScript, Bootstrap, Jquery, MERN, SQL, Mongoose, React Native, Git and Korean.

Relevant Experience

- **Restaurant Website** - I created a sushi themed website using React js for frontend and node js for backend. As well as added Stripe for shopping cart checkout. Allowing me to improve my skills as a full stack programmer and give flexibility in doing both.
- **Weather App** - Programmed weather app that forecasted current weather conditions, integrating APIs on the backends that communicates with the frontend. Entering zip code with country code will result showing current weather at that time.
- **RESTful API** - Experimented with developing an API where I familiarized myself with the in's and out's of its mechanics while testing the requests with postman along with mongoose.
- **Motivational Quote App** - Coded React Native app to communicate with two different API's to show a quote with a unique background with each click of the button.

Work Experience

Web Developer, Freelance, Aurora, CO   Aug. 2019 - Present
- Cooperated in integrating the Toast POS system in a business which increased sales and profits by establishing a more convenient method for getting customers orders.
